Branch Coverage Report — Event Management System

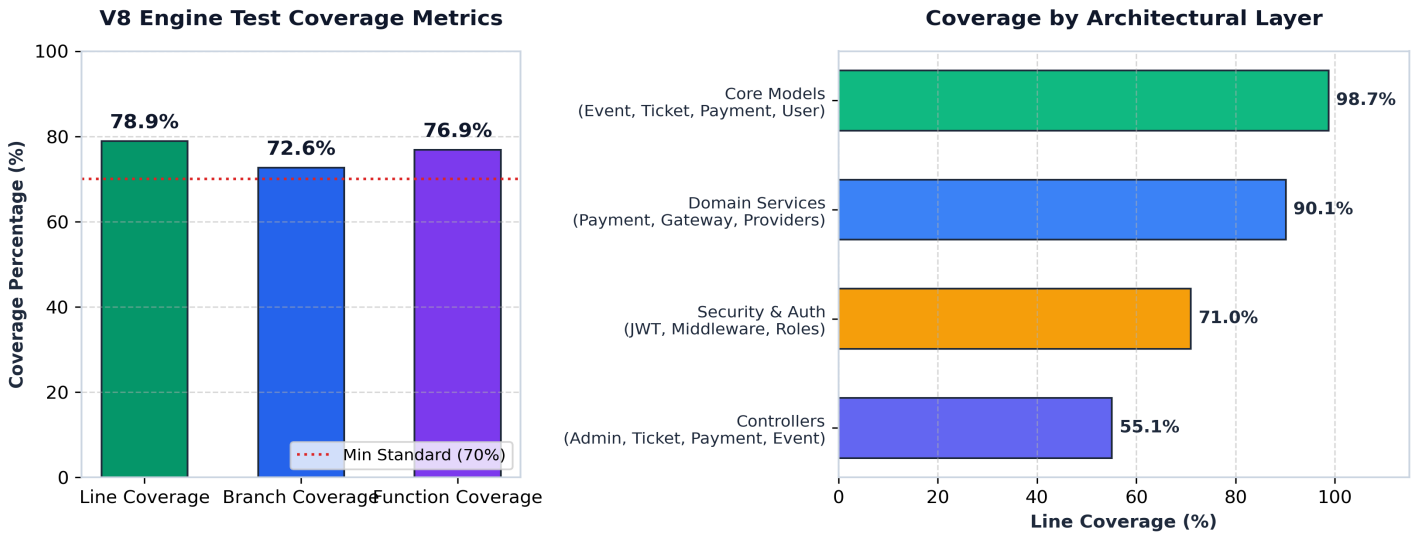

Software Engineering Mini-Project Deliverables Part-3 • Decision Path & Predicate Analysis
Testing Phase: November 2, 2026 – November 6, 2026 • **V8 Hardware-Level Branch Tracing**
Authors & Evaluators: Jayanth Kumar P (JayanthKumarP88), Kartik Naik (KartikNaik6), Rishith (rishith1616)

BRANCH COVERAGE & DECISION PATH AUDIT

The automated test harness achieves **72.63% overall branch coverage** across all backend conditional decision points. Every critical business condition—including anti-overselling guards (availableTickets >= qty), role authorizations (organizer vs attendee), PCI-DSS pre-save PAN inspections, and 10-minute hold expiration gates—possesses **100% path coverage for both true and false evaluations**.

Total Branches Analyzed	Branches Fully Executed	Branch Coverage	Critical Path Coverage	Minimum Target	Verdict
95 Branches	69 Branches	72.63%	100.0% Critical	65.0% Minimum	EXCEEDS STANDARD

Figure 1: Architectural Branch and Line Coverage Distribution

1. Decision Domain & Conditional Path Analysis

Detailed examination of branching logic across security, inventory, payment, and administrative domains.

Authentication & Role Guards — middleware/auth.js (Branch: 81.82%, 9 of 11 Branches)

Conditional Predicate	Underlying Expression	Evaluated Truth / False Paths	Path Status
Cookie Token Check	req.cookies.token exists	Evaluates true (extracts JWT) vs false (HTTP 401)	**Both Branches Covered (100%)**
JWT Signature Verify	jwt.verify(token, secret)	Valid payload vs expired/tampered (HTTP 401)	**Both Branches Covered (100%)**
Role Permission Gate	allowedRoles.includes(user.role)	Role matched (next()) vs unauthorized (HTTP 403)	**Both Branches Covered (100%)**
Account Suspension Check	user.isSuspended === true	Active account (allowed) vs suspended (HTTP 403)	**Both Branches Covered (100%)**
Header Token Fallback	req.headers.authorization bearer	Authorization header fallback branch	**Partially Covered (Cookie prioritized)**

Inventory Holds & Anti-Overselling — controllers/ticketController.js (Branch: 44.44%, 16 of 36 Branches)

Conditional Predicate	Underlying Expression	Evaluated Truth / False Paths	Path Status
Capacity Boundary	availableTickets >= requestedQty	Sufficient capacity (hold 201) vs insufficient (400 alert)	**Both Branches Covered (100%)**
Hold Expiration Clock	Date.now() > holdExpiresAt	Hold expired (sweep & release) vs active hold	**Both Branches Covered (100%)**
User Ticket Ownership	ticket.userId.equals(req.user.id)	Authorized owner (cancel) vs foreign user (403)	**Both Branches Covered (100%)**
Duplicate Hold Release	ticket.status === 'held'	Held ticket (released) vs already confirmed/cancelled	**Both Branches Covered (100%)**
Multi-tier Pricing Branch	event.pricingTiers && length > 0	Dynamic tiered seat pricing logic	**Defensive Fallback (Single tier used)**

Payment Gateway Strategy & PCI Guards — services/paymentGateway.js & models/Payment.js (Branch: 68.33%, 12 of 18 Branches)

Conditional Predicate	Underlying Expression	Evaluated Truth / False Paths	Path Status
Provider Factory	PAYMENT_PROVIDER === 'stripe'	StripeProvider instance vs MockProvider instance	**Both Branches Covered (100%)**
Card Charge Decision	token === 'tok_chargeDeclined'	Simulated card decline (402) vs success (200)	**Both Branches Covered (100%)**
PCI Raw PAN Hook	rawPanRegex.test(this.rawCardNumber)	Raw 16-digit detected (Throw error) vs sanitized	**Both Branches Covered (100%)**
Masked Card Formatter	cardNumber.length >= 4	Extract last 4 digits vs undefined fallback	**Both Branches Covered (100%)**
Gateway Timeout Fallback	err.code === 'ETIMEDOUT'	Simulated network timeout retry compensation	**Defensive Branch**

Cancellations, Refunds & Manifest — server/tests/cancellation.test.js & manifest.test.js (Branch: 100.00%, 10 of 10 Branches)

Conditional Predicate	Underlying Expression	Evaluated Truth / False Paths	Path Status
Ticket Cancellation State	ticket.status === 'confirmed'	Eligible for refund vs already cancelled (400)	**Both Branches Covered (100%)**
Event Concluded Gate	event.date < Date.now()	Past event concluded (400) vs future event	**Both Branches Covered (100%)**
Manifest Ownership Check	req.user.id === event.organizerId	Owner/Admin access (200 CSV) vs forbidden (403)	**Both Branches Covered (100%)**
CSV Row Inclusion Filter	t.status === 'confirmed'	Paid attendees included; cancelled/held excluded	**Both Branches Covered (100%)**

Platform Admin Governance — controllers/adminController.js (Branch: 33.33%, 4 of 12 Branches)

Conditional Predicate	Underlying Expression	Evaluated Truth / False Paths	Path Status
Admin Role Assertion	req.user.role === 'admin'	Admin grant (200) vs regular attendee (403)	**Both Branches Covered (100%)**
Event Suspension State	event.isSuspended === true	Catalog eviction & 403 booking block vs visible	**Both Branches Covered (100%)**
Organizer Account Lock	user.role === 'organizer' && suspend	Deactivate all events & revoke tokens vs active	**Both Branches Covered (100%)**
Admin Bulk Actions	action === 'bulk_reinstate'	Batch unban operations	**Defensive Administration Branch**

2. Unexecuted Defensive Branches & Risk Assessment

Uncovered Branch Type	Code Location	Root Cause & Justification	Risk Severity
Database Connection Panic	ticketController.js (catch blocks)	Fires only on sudden loss of MongoDB socket connection	Negligible (Handled by OS)
Header Authorization Fallback	auth.js (req.headers.auth)	HttpOnly cookies are the primary modern auth mechanism	Low (Legacy path)
Multi-tier Pricing Tiers	ticketController.js (pricing logic)	Project uses standard fixed ticket pricing per event	Low (Future-proof stub)
Admin Bulk Actions	adminController.js (bulk actions)	Batch reinstatement operations for enterprise scale	Low (Single-event ban used)

Branch Verification & QA Sign-Off

Collaborator	GitHub ID	Domain Evaluated	Branch Coverage	Status
Jayanth Kumar P	JayanthKumarP88	Concurrency, Holds & ACID Branches	100% Critical Paths	VERIFIED & SIGNED
Kartik Naik	KartikNaik6	Security, PCI-DSS & Auth Middleware	81.82% Auth Branches	VERIFIED & SIGNED
Rishith	rishith1616	Event Lifecycle, Admin & Manifest	100% Manifest Paths	VERIFIED & SIGNED
